

# OFF-SITE SERVICES

## HEPA AIR HANDLING UNITS

*Do these questions apply to you?*

1. Can you find your HEPA ventilation and vacuum cleaners when needed?
  2. Are your HEPA ventilations and vacuums working properly when required?
  3. Are qualified technicians DOP testing and maintaining your units?
  4. Do you purchase new units because your existing units are not refurbished?
  5. Do you have an excess of HEPA ventilation and vacuum cleaners at the end of each outage that can be shared with sister plants?
  6. Do you have the storage space and expertise to maintain you HEPA units?
- 
7. Why tie up capital for HEPA units and vacuum cleaners when needed for only short periods of time?
  8. Is your core competency maintaining and repairing portable HEPA ventilation and vacuum cleaners?

*UniTech Services Group* has developed a HEPA ventilation and vacuum cleaner maintenance program, which allows utilities the opportunity to outsource the care, testing and leasing of HEPA equipment.

## HEPA AIR HANDLING UNITS

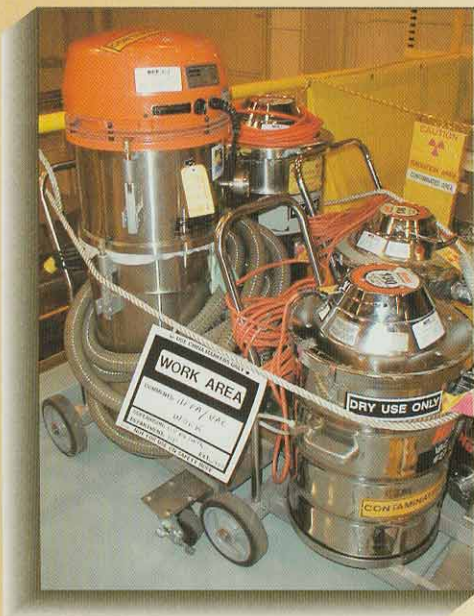

### **HEPA Vacuum/Portable Air Handling Unit Repair and Maintenance Services**

UniTech, an ISO 9002 certified company recently expanded our capabilities to include the addition of off-site HEPA ventilation and vacuum cleaner maintenance, repair, testing and leasing.

*These services ensure HEPA units are ready to go when needed!*

- Portable HEPA units are typically NOT maintained in a manner that supports their continued use.
- At the end of an outage, HEPA and vacuum cleaners are typically stored in Sealand trailers or in a radwaste cubical.
- Units are seldom maintained or refurbished to support planned or unplanned outage work.
- Shorter outages have driven more detailed planning and schedule accountability.
- The loss of a day or two because of work delays due to lack of an operational HEPA unit or vacuum cleaner can be avoided.

UniTech can perform turnkey maintenance, storage, repair and testing of all your portable ventilation units and vacuum cleaners. Complete assessment of your units on hand and recommended cost to make units 100% operable. A detailed maintenance history report will be maintained on file.

*Learn how UniTech Off-Site Services can augment your site's laundry, respirator and equipment decontamination programs. Contact us at the address below or call your UniTech Account Manager.*
