

CoolVest

**The smart undergarment
for hot environments**

**Outlast Adaptive Comfort®
technology - originally
developed for NASA -
reduces overheating and
perspiration**

CoolVest is the optimal garment to wear under protective garments when working in hot environments. Its Outlast Adaptive Comfort® technology helps workers adapt to surrounding conditions - including heat and cold - for enhanced worker comfort and safety.

The Outlast® Principle

Creating a well-balanced climate for optimum comfort

Challenge:
Varying environmental temperatures and conditions can upset comfort levels.

Solution:
Outlast® materials absorb, store and release excess body heat to maintain temperature balance.

Result:
A permanent cycle of comfort through regulated temperature.

New!

Cool • Comfortable Improves Worker's Wellbeing

Holds prestigious Certified Space Technology™ seal of approval

Here's how the CoolVest works:

When working in hot environments, a worker's body temperature fluctuates, resulting in discomfort. Outlast Adaptive Comfort® Technology, worn against the skin, helps the worker adapt to surrounding conditions and stay comfortable. It keeps the worker cool in heat (and also preserves heat in cold conditions)!

Features	Benefits
The material absorbs excess body heat	Increases comfort
Cool and fresh to the touch	Reduces perspiration
Zip front	Easy to put on and take off
Lightweight	Provides comfort without bulk

CoolVest has a useful life cycle of approximately five washes.

Item No	Size
COOL-31A	M-4XL
