

# New Laundry Bag System

**Improved Ergonomics Reduce Both Handling Man-Hours & Injuries**

**Bags are color-coded to make sorting simple!**

## **Bags made with the new ImpervaGuard fabric!**

ImpervaGuard is a remarkable textile: durable, waterproof and laundering to excellent decontamination factors. UniTech's complete, lab-tested ImpervaGuard bag family provides:

- 200 denier nylon (400 denier for tool and equipment bags)
- Solvent-based polymer urethane coating
- Heavy-duty seams
- Available for direct sale or flexible UniTech lease – enjoy excellent savings as compared to disposables
- Long-lasting!

Holds up to approximately 35 lbs. of laundry, limiting the weight an employee will carry: Has three ergonomic handles for safe, comfortable lifting.

**What's the new UniTech bag program? A color-coded sorting system facilitating ALARA principles by minimizing cross contamination - and making handling and workflow easy!**

## Laundry Bags

- Clear window lets you easily see bag contents – no more opening the bag to check what's in it!
- All printing is done with gas transfer, alleviating FME concerns and clearly marking potentially radioactive contents
- Flat bottom and tapered construction lets bag sit comfortably on the floor and not fall out of the stand during filling

## Stands

**O-stand:** New! The best way to hold and then remove your laundry bag. Designed to fit the circumference of IMPERVAGUARD laundry bags. Breaks down for easy storage using minimal space.

**X-stand:** Our cost-effective classic.

**Tool Bag**

**HP Belt Bag**

**Respirator Bag**

- Strap with secure clasp quickly and effortlessly seals in contents for transport
- Three ergonomic handles, including two convenient side handles and a bottom handle, mean controlled easy lifting; no more pinching the bag to lift. Enjoy easy carrying and removal of the full bag from the side of the stand (which is better for the back than top removal)
