

Comfortable • Cool • Cost-effective • Launderable

Splash Protection Apron

Typically, garments that protect well from water splashes do not breathe well and can cause workers to get hot and uncomfortable, potentially even leading to heat stress.

UniTech's new Splash Protection Apron provides a comfortable, cost-effective and launderable solution when a worker is involved in tasks that may cause the front of the body to get splashed.

- Front and sleeves made of single-ply fluid-resistant barrier fabric (100% continuous filament polyester taffeta)
- Back made of yellow polyester/cotton blend fabric for breathability
- Two sets of tie closures (one at back of the neck and one at waist)
- Opens in back for additional comfort and ventilation

Item No	Description	Size
APRON-05A-YW	100% continuous filament polyester taffeta water-resistant apron with sleeves	one size

More Splash Protection for Every Need

DryGuard Plus Waterproof Disposable Coverall

Need the most complete protection from water and many chemicals?

- Made from a heavy duty, water-resistant SMS (SMS barrier fabric is a unique trilaminate construction that offers a high tensile strength and yet is comfortable to wear)
- 100% water repellency rating as well as excellent resistance to a wide variety of chemicals
- Double sealed seams (sewn and taped) to ensure liquid holdout
- Newly redesigned coverall pattern puts the upper seam across the chest, rather than along the shoulders like traditional overalls, eliminating the stress points in the shoulders where tear outs may occur
- Underarm area features a sweep design that allows for greater range of motion in the arms without the risk of tear outs
- Fully plastic zipper with a #10 pull that allows for easier use with gloved hands
- Features elastic wrists, ankles and hood as well as a storm flap with self-adhesive tape to cover the zipper
- Packaged 25 per case

Item No	Size
Z-COV-19YW	Large-4XL
