

3M™ Versaflo™ Respirator Systems

Highly Versatile Systems for Respiratory Protection

3M™ Versaflo™ Respirator Systems are a comfortable, comprehensive approach to worker protection. Each system has three easy-to-select modules — headgear, breathing tubes, and air sources — that can be combined into dozens of system configurations. This allows Versaflo system users to experience maximum flexibility as they move from one environment to another, or from one application to the next.

RS-3MTR-600
and accessories

Available in TR-300 and TR-600 Models

TR-300

The lightweight 3M™ Versaflo™ TR-300 Powered Air Purifying Respirator is the key to easy-to-use, versatile respirator systems for particulate environments. With its compact, well-balanced and slim design, the Versaflo TR-300 powered air respirator is the answer to respiratory protection needs for many users.

TR-600

The TR-600 takes the entire Versaflo system to greater levels of confidence, control and comfort. Representing an advanced evolution of technology with increased excellence in powered air respiratory safety, your world of protection just expanded and is better than ever.

Simple

The Versaflo system is easy to use, with simple, one-button operation. It also has two types of alarms — one audible and one LED — to alert the user to either a low battery or low airflow, such as when a particle filter is fully loaded.

Intelligent

The lightweight lithium ion battery quickly charges and has no memory effect or heavy metals. The Versaflo system uses intelligent chargers to help maintain the optimum battery performance and are available in single-station or four-station configurations.

Customizable

Finding the right Versaflo respiratory system is easy. You may choose a complete PAPR assembly, or create your own by choosing from our products which best fit your needs.

3M™ Versaflo™ Systems are Easy to Select

Choosing a Versaflo™ system is as easy as 1, 2, 3. Just choose your headgear, breathing tube, and an air source that fits your needs from our product matrix below. All Versaflo components are interchangeable, giving you the flexibility to find different Versaflo solutions for different exposures, applications, locations, or tasks.

Supplied Air Valves

This supplied air respirator assembly can help regulate the flow and temperature of supplied air system. Cools the air up to 50°F (28°C). Includes the cooling tube, waist belt and holder.

RS-3MV-100

Vortex Cooling Assembly

3M™ Versaflo™ for Welding Applications

With its smart, compact design, the 3M™ Versaflo™ Powered Air Purifying Respirator (PAPR) has been created to meet your welding needs. This unit is designed to offer continuous filtered air. By using the Versaflo PAPR combined with a state of the art welding helmet, you get both increased protection and comfort.

- Offers full mobility
- Slim profile is perfect for use in tight spaces
- Welding filter: variable dark shade 5, 8, 9-13 for most types of arc welding
- Possible to lock-in any shade, e.g. in the light state 3 when grinding
- Delay function to set the dark-to-light opening time
- Sensitivity of the arc detection can be adjusted for unsurpassed switching reliability
- Tack welding comfort mode help minimize eye strain during extended tack welding applications
- Fits with 3M™ PELTOR™ Welding Earmuff H505B

Welding Filters
